

IN THE CLAIMS

*Subj* (Amended) A dispenser for a hand covering, comprising:  
a housing to receive a roll of flexible film defining a central axis, the film [and] having first and second surfaces, the first surface including an applied adhesive[, the housing including an aperture through which the film may be pulled and drawn off the roll];  
an edge operative to separate the film drawn off the roll [film] into individual sheets for use [through the introduction of a cutting force]; and  
[a platform area between the aperture and the edge, wherein the first side of the film is exposed] a base member between the roll and the edge over which the film is drawn with the first surface facing outwardly, the base member being proportioned to permit placement of a hand to be covered thereagainst.

2. (Amended) The dispenser of claim 1, [wherein the] further including an aperture [is a slot oriented substantially parallel to the axis of] through which the film may be pulled and drawn off the roll.

~~Cancel claim 4.~~

~~Claims 5, 6, and 7, line 1, replace "4" with -1--.~~

~~Claim 8, line 1, replace "4" with -1--, and before "film" insert -flexible--.~~

*a2* 10. (Amended) A method of adhering a film to a hand, comprising the steps of:

*a 2*  
*long.*  
providing a dispenser according to claim 1;

[providing] loading a roll of the flexible film into the housing [having a surface with an adhesive];

[positioning] drawing the film [within a platform area] over the base member such that the surface with the adhesive is facing outwardly; and

pressing the palmar surface of a hand against the film and base member [positioned in the platform area].

*a 3*  
Cancel claims 11-12.

13. (Amended) The method of claim 11, wherein the [platform area has a perimeter section terminating in] dispenser further includes a cutting edge, and wherein the method further includes the step of:

*a 3*  
drawing the film adhered to a hand past the film-separation edge; and  
applying a force with the hand to sever the film at the cutting edge.

14. (Amended) The method of claim 10, wherein the film includes spaced-apart perforation regions to assist in severing the film.

*a 4*  
Cancel claims 15-16.

17. (Amended) The method of claim [16] 10, wherein the base member includes hand-positioning visual indicia, and wherein the method includes the step of visualizing the indicia
